RACING TO FIND A CURE FOR ALS

ALS FACTS //

- **What is ALS?** Learn about the disease at www.alstdi.org/whatisals. We created AT-1501, a novel antibody targeting a specific aspect of ALS which has shown more exciting results in the lab than anything we have ever tested.
- **An estimated 30,000 people** in the US have ALS at any given time.
- **Roughly 450,000 people** worldwide are living with ALS.
- **Every 90 minutes**, someone in the US is diagnosed with ALS.
- **Currently, there is no cure** or effective treatment for ALS. We are working to change that!
- **About 10% of ALS cases** have a genetic history of ALS, known to the research community as "familial" ALS.
- **Roughly 90% of ALS cases** occur w/o any family or genetic history of ALS, referred to as a "sporadic" case of ALS.
- **Today, most people with ALS** only survive 2 to 5 years from the time of their diagnosis.
- **ALS stands 4 Amyotrophic Lateral Sclerosis.** It's also called "Lou Gehrig's Disease" in the US & Motor Neuron Disease/ MND around the world.
